PROGRAM OVERVIEW:

PLAZA CONSTRUCTION ONLINE SAFETY TRAINING

At Plaza Construction we believe focusing on safety is everyone's job and responsibility. A safe working culture is a productive and cost-effective working environment. We value consistent re-enforcement of safety standards as we do other core strengths. We support our team members with training and education to properly protect themselves and their fellow workers.

Plaza's Management Team is actively involved with our employees in establishing and maintaining an effective safety program company-wide. To provide efficient access to our safety program, we have implemented this online tool to enhance our safety training and educational needs. We have developed guidelines and activities that include but are not limited to:

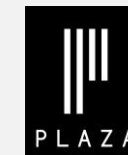

- Promoting safety program participation by all employees;
- Providing safety and health education and training;
- Adopting, reviewing and updating workplace safety rules and regulations; and
- Providing the resources necessary to promote a safe workplace.

Our safety program has been adopted as the standard of practice for Plaza Construction Group Florida and compliance with our safety rules will be required by all employees as a condition of employment.

We hope that you find this tool both user friendly and educational as we continue to provide new and innovative ways to enhance individual career growth and organizational excellence.
